

# Current Opinion Journal Series from Lippincott Williams & Wilkins

## 24 Discipline-Specific Titles Presenting Reviews of the Latest Clinical Research Developments

- Quickly get a snapshot of major global clinical developments in your field published in the previous year
- Uncover concise and critical assessments of the latest research by only the leading international experts in their fields
- Find answers to questions efficiently with the journals' unique and structured format
- Time-saving workflow tools—such as email jumpstarts, online abstracts, and search results annotations - help you pinpoint, access, and mark specific search results, articles, and reviews

Tens of thousands of articles in clinical medicine are published all over the world every day. Healthcare professionals—whether they work in a clinical, research, or an educational setting—simply don't have enough time to dig through every article in their field, let alone identify the most important developments and how those may impact their work.

The *Current Opinion* journals from Lippincott Williams and Wilkins—available on Ovid—are regarded as the most efficient and authoritative way to keep informed of all major developments in clinical medicine. The international editorial boards search across millions of journal articles published worldwide each year, presenting concise and reliable analysis of the most significant research advances and papers of interest that impact general practice.

And on Ovid, you can search and manage the Current Opinion articles faster with Ovid's precision search and workflow tools.

## What are the benefits?

- Targeted content—each issue covers just 1-3 topics with bulleted lists of each article's key points
- Selected bibliographies after each article providing short annotations for papers of greater interest
- Choose any number of single titles or get the entire collection
- Enjoy embargo-free access to all Current Opinion journals
- Search all journals—and all your other Ovid subscribed resources— with just a single search query.
