

BioDigital Human and BioDigital XR

Cutting-edge solutions that take students from the classroom to practice

BioDigital Human

Take students on a virtual anatomy tour, where they can immerse themselves in the inner workings of the human body and explore disease evaluation, progression, and treatment in 3D.

BioDigital XR

Experience the BioDigital Human in extended reality for the best experience in anatomy education. Featuring 3D anatomy from the world's largest library of immersive anatomy, disease and treatment models, including complete male and female anatomy, regional and system anatomy 3D models, BioDigital's market-leading platform powers extended reality content across any device - providing the most engaging anatomy education for your students.
