APA PsycInfo®

Description

With more than 4 million bibliographic records centered on psychology and the behavioral and social sciences, the interdisciplinary content in APA PsycInfo® makes it one of the most highly utilized databases by students, researchers, educators, and practitioners worldwide.

Explore the full breadth of research in the behavioral and social sciences with confidence. Focused on the interdisciplinary aspects of the worldwide behavioral and social science research and literature, APA PsycInfo is unmatched as a resource for locating scholarly research findings in psychology and related fields across a host of academic disciplines — from the historical to the cutting edge.

It contains citations and summaries of peer-reviewed journal articles, book chapters, books, dissertations, and technical reports, all in the field of psychology and the psychological aspects of related disciplines, such as medicine, psychiatry, nursing, sociology, education, pharmacology, physiology, linguistics, anthropology, business, and law.

Journal coverage, spanning 1806 to present, includes international material selected from more than 2,500 periodicals from more than 49 countries written in 29 languages. Current chapter and book coverage includes worldwide English-language material published from 1987 to present. Over 80,000 records are added annually through weekly updates. More than 36 million references in over 870,000 journal articles, books, and book chapters; retrospective to 2001 and earlier, where available; more than 3.2 million references from 1920 to

2000.
