

Ovid Discovery has several AI-enabled features, including the following:

If you search for more than one concept with the Discover widget, your search results are powered by AI.

Click **AI Assistant** to see key metrics, essential insights and to discover principal concepts.

The screenshot displays a search results page for 'pressure ulcers' with approximately 7,000 results. The interface includes a left sidebar with filters, a main results area with article snippets, and a right sidebar with 'UpToDate' and 'From Medline' recommendations. A 'Related Searches' section is also visible at the bottom of the results area.

Use these health-related facets based on AI to refine your search.

Related searches and search suggestions are also AI-powered.

Ovid Discovery AI combines natural language processing and AI to create a semantic search that considers the meaning and context of your search query. This produces search results that are not only relevant and accurate, but also understand the intent of the search.
