NEJM Remote Access Guide

1. Sign in to or be present within your institution's network/IP range.

2. Sign in to or create a **My Account**, located at the top right.

3. You create an account with a valid user email and password set by you.

4. Once access is paired, you may use any device off campus to access your institution's subscriptions, provided you are signed in to your **My Account**.

5. If your institution has site license access, the institution's access rights will automatically be applied to your paired account for 180 days. This pairing will update each time you are signed in to your **My Account** while on your institution's network.

6. View details/screenshots for monitoring your remote-access status, affiliations, and expiration dates.

Scan code to sign in

NEJM, *NEJM AI*, NEJM Catalyst, and *NEJM Evidence* subscribers now have a unified **My Account** to manage their personal profile information. With one username and password, you have single sign-on to visit NEJM.org, ai.nejm.org, catalyst.nejm.org, and evidence.nejm.org.
